- Ergonomic Expertise
- Project Management
- Installations
- Furniture Removal & Recycling
- Storage Audits
- Work Place Assessments
- After Care Service

We deliver innovative and practical *fit-out and office furniture* solutions for the commercial work space

Consultation

A member of our dedicated sales team will personally visit you on-site to discuss your current requirements. Our objective is not only to understand your current business needs but also to establish your future objectives. By doing so, we can create a comprehensive brief that considers various factors such as budget, size, scope, colours and design aspirations. This collaborative approach ensures that we tailor our recommendations to your unique preferences and vision.

Space Planning

After conducting a thorough measurement of the site, we will commence the process of space planning your new environment. Utilising your brief and incorporating the latest standards, our team will generate either 2D or 3D CAD drawings. These visual representations will allow you to witness your space coming to life, providing a realistic preview of the proposed layout and design.

Products

With our extensive background in office furniture manufacturing and supply chain management, we are well-equipped to provide you with the latest products at competitive prices. To ensure complete satisfaction, we can provide sample finishes of our products as well as having access to several showrooms where you can leisurely view our ranges.

Ergonomics

Wellbeing is a major factor in our philosophy. We provide support from detailed individual workplace assessments through to ergonomic products and instructions on how to sit and use your chair correctly.

Installation

Rest assured, we will take care of the entire project from concept to completion, providing a seamless experience for you. Our team will manage every aspect ensuring that the installation of your new office furniture is executed flawlessly. Once the installation is complete, our team will remove all packaging materials and dispose of any rubbish generated during the process.

Customer Service

Our goal is to ensure that you are completely satisfied with the final result. Our customer support team will always be on hand to assist with any queries you may have.
